Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

1. Claims 1 and 8 are objected to because of the following informalities:

In claims 1 and 8, line 5, "a surge suppression circuit" should be "the surge suppression circuit".

In claim 2, "said energy dissipating elements" should be "said plurality of energy dissipating elements". Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-9 are rejected under 35 U.S.C. 102(e) as being anticipated by Macanda (PN 20040070913).

Regarding claims 1, 3 and 8, Macanda discloses a surge suppression device (figures 3 and 4) formed by the steps of testing series of energy dissipating elements to identify a plurality of energy dissipating elements, each having a nominal voltage within less than approximately +/- 5% of mean nominal voltage of the plurality, assembling the

plurality of energy dissipating elements into the surge suppression circuit (page 3, 0027, and page 20015).

Regarding claims 2, 5-7, Macanda discloses the energy dissipating elements are metal oxide varistors (5a-5f, fig. 3 and 4).

Regarding claims 4, 9, Macanda discloses a thermal cut off device (e.g. 6).
